

Optional Additional Testing

At Keelan Eye Care, we are dedicated to providing our patients the best eye care possible. Sight threatening diseases such as **Glaucoma, Macular Degeneration, Diabetic Retinopathy** and others generally have no outward signs or symptoms, which is why examinations, including retinal evaluation, are important to protect your vision. Therefore, in an effort to provide a more thorough eye exam, our practice has incorporated the **iWellness Exam SD-OCT Retinal Scan** and **Optomap Ultra-Wide Digital Retinal Imaging** as part of your eye examination today. These tests will become part of your permanent patient record and will be reviewed with you by the doctor during your examination.

Like an MRI of the eye, the iWellness Exam reveals ocular anatomy and signs of disease in exquisite detail. This unique technology can help detect potentially vision threatening, as well as systemic diseases in their very early stages, when they are most treatable.

YES, I understand there is a \$30 charge for the Optovue Exam that is typically not covered by my medical insurance or vision insurance unless being used to actively follow disease. This cost will be added into the price of your visit today.

NO, I understand that I am declining the Optovue Exam as presented today.

The Optomap Retinal Exam is an ultra-widefield retinal examination and a revolutionary diagnostic tool that allows your doctor to view the majority of your retina. This is a non-dilating camera that captures a digital image of the retina.

YES, I understand there is a \$30 charge for the Optomap Exam that is typically not covered by my medical insurance or vision insurance unless being used to actively follow disease. This cost will be added into the price of your visit today.

NO, I understand that I am declining the Optomap Exam as presented today.
