

## Optional Additional Testing

At Keelan Eye Care, we are dedicated to providing our patients the best eye care possible. Sight threatening diseases such as **Glaucoma, Macular Degeneration, Diabetic Retinopathy** and others generally have no outward signs or symptoms, which is why eye examinations, including retinal evaluation, are important to protect your vision. Therefore, in an effort to provide a more thorough eye exam, our practice has incorporated the **Optomap ultra-wide digital retinal imaging** and **Optovue iWellness Scan** as part of your eye examination today. These tests will become a part of your permanent patient record and will be reviewed with you by the doctor during your examination. Combining your eye doctor's expertise and new technology, these tests are great options to add to your eye exam.

---

1.) The Optomap Retinal Camera is a revolutionary Diagnostic tool that provides an ultra-wide retinal image that allows your doctor to view the majority of your retina. This is a NON-DILATING camera that captures a digital image of the retina, and is highly recommended for ALL eye exams and ALL ages to help monitor changes year after year.

**YES**, I would like to have an **Optomap** screening today. I understand that there is a **\$35** charge that is typically not covered by your medical or vision insurance unless being used to actively follow disease.

**NO**, I am declining the **Optomap** screening.

---

2.) Like an MRI of the eye, the Optovue iWellness scan reveals ocular anatomy and signs of disease in exquisite detail. This unique technology can help detect potentially vision threatening issues, as well as systemic diseases in their very early stages, when they are most treatable.

**YES**, I would like to have an **Optovue iWellness** screening today. I understand that there is a **\$35** charge that is typically not covered by your medical or vision insurance unless being used to actively follow disease

**NO**, I am declining the **Optovue iWellness** screening.

---

If you would like both tests done there is a **\$10** discount, making it **\$60** for both.

I prefer to discuss these options with the Doctor before deciding.
